18. Maintenance and Help

18.1. Care and Maintenance

You device is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you protect your warranty coverage and enjoy your device for many years.

Keep the phone and all of its parts and accessories out of

reach of small children.

Keep the device dry, precipitation, humidity and all types

of liquids or moisture can contain minerals that can

corrode electronic circuits.

Do not use or store the device in dusty, dirty areas.

Do not store the device in hot areas. High temperatures

can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.

Do not store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage electronic circuit boards.

Do not attempt to open the device other than as instructed in this guide.

Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.

Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Wipe it with a soft cloth slightly dampened in a mild soap-and-water solution.

Use only the supplied or approved attachments.

If the phone or any accessory is not working properly, take it to your nearest qualified service facility.

18.2. On Battery

Your device is powered by a rechargeable battery. The full performance of a new battery is achieved only after two or three complete charge and

discharge cycles.

The battery can be charged and discharged hundreds of times but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, buy a new battery.

Unplug the charger from the electrical plug and the device when not in use. Do not leave the battery connected to a charger after the battery has finished charging. Overcharging may shorten its lifetime.

If left unused, please keep recharging over 20 minutes before using it.

18.3. Help
